

Do I need to apply for installing photovoltaic panels

Do you need a permit to install solar panels?

Generally, local governments require a homeowner's solar installer/contractor to obtain a permit for rooftop panels before they can be installed. After the PV system is installed, a professional from the local government will inspect the new array to ensure all building, electrical, and safety codes have been followed.

Do I need an inspection before installing solar panels?

An inspection before installation is necessary to ensure that your property's electrical system can handle the addition of solar. If you're installing a rooftop solar panel system, an engineer will also need to inspect your roof's structure to make sure it can withstand the additional weight of the solar panels and racking equipment.

Can I install my own solar panels?

Although DIY options are available, hiring a professional solar company is best to ensure your panels are correctly and safely installed. Yes, it's possible to install your own solar panels. However, DIY installations require electrical skills and advanced knowledge of solar energy that most DIYers don't have.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How do I install a solar PV system?

Components that are certified and tested for solar PV installations must be installed in accordance with the NEC and the manufacturer's installation instructions. Most residential solar PV systems are very simple from an electrical standpoint, and they can be designed by a solar or electrical contractor.
