How much does a wind turbine cost?

The typical wind turbine is 2-3 MW in power, so most turbines cost in the \$2-4 million dollar range. Operation and maintenance runs an additional \$42,000-\$48,000 per year according to research on wind turbine operational cost. See the National Renewable Energy Laboratory's website for the most recent (December 2022) Cost of Wind Energy Review.

How much does a wind energy project cost?

To then run the wind energy project requires ongoing operations and maintenance costs. How Much Do Wind Turbines Cost? Land-based wind turbine prices fell in 50% between 2008 and 2020, with a slight increase to about \$850 to \$950 per kilowatt in 2022. How Much Is the Installed Project Cost?

Should you buy a wind turbine?

Purchasing a wind turbine is one cost to developing a wind farm, along with other installation expenditures, but there can be many financial benefits to wind energy development. Photo from Werner Slocum, National Renewable Energy Laboratory A wind turbine typically pays for itself after a number of years, but it will have high upfront costs.

Why are wind turbines so expensive?

The values are based on typical wind turbines in use today. On the other hand, newer wind turbine technologies, such as carbon fiber, are more expensive. Engineering designs that eliminate the need for certain turbine components -- such as a transition piece -- tend to drive down costs.

Are wind turbine costs getting too low?

In recent years, wind turbine manufacturers like Siemens have expressed concerns that the cost of wind energy is getting too low to maintain the development and growth of the market. Rising costs, and government pricing structures present constant challenges to manufacturers.

What is the most expensive part of a wind turbine?

Tower- steel or concrete support for the moving parts of a wind turbine. According to WindEurope, the tower of a wind turbine is the most expensive part of a turbine. It costs 26.6% of the total. The rotor blades of a wind turbine are the second most expensive part of the turbine, costing 22% of the total.
