

Modify the solar tube bracket

How do you connect a solar panel extension cable?

To connect a solar panel extension cable, one end plugs right into the solar panel's MC4 connectors. The other end is bare wire. You can use a connector, such as an SAE connector, to connect the wires. Strip the wires and splice it onto the extension cable using a heat-shrink butt splice.

How do I install a solar panel on a PVC mount?

To install a solar panel on a PVC mount, make sure your cuts are straight when working with PVC. You can use a compound miter saw, or a miter box if you don't have access to power tools. Once you have the mount assembled, place it on top of your solar panel to check the fit.

How do I install a solar light dimmer?

t Dimmer Installation Tips Install Solatube Solar-Powered Daylight Dimmer only on a properly aligned Solatube Daylighting System. Always mount the solar panel on the upslope of the flashing. If the remote is not working, check the batteries to see if they have slipped out of the proper alignment or if the battery is dead.

How do you attach a T-fitting to a frame?

To attach a T-fitting to a frame in building a portable solar panel mount out of PVC, pop some screws through the PVC pipe and into the wooden dowel to lock the T-fitting in place. Do not cement any part of this hinge assembly. Spread some PVC primer and cement on the legs and T-fittings and push them into place.
