Are solar stack roof mounting systems UL 2703 listed?

Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.

Can a racking system be used to ground a PV module?

This racking system may be used to ground and/or mount a PV module complying with UL 1703 only when the specific module has been evaluated for grounding and/or mounting in compliance with the included instructions. The system is a non-separately derived system.

Will NEC codes affect a rooftop PV system?

orl donline.com/2014/09/new-nec-codes-will-affect-installations-2.33 2014 NEC, Section 690.12.34 The rapid shutdown provisions require that, for conductors more than five feet in length inside a building, or more than ten feet from a PV array, control circuits as part of a rooftop PV system have the ability to reduce voltage.

Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner. While metering the system is encouraged, the specification does not address system wiring elements for associated system sensors or monitoring equipment.
