

# Purchase price of rooftop photovoltaic panels

What is a good price per watt for rooftop solar?

A good price per watt for rooftop solar provides a balance of savings potential and robust warranty and service coverage. Based on recent solar pricing trends from the SEIA, this balance can be found in the \$3-4 per watt range for residential solar projects.

Is rooftop solar a good investment?

At its core, rooftop solar is a way to pre-purchase 25 years of electricity in order to hedge against ever-rising utility rates - quite similar to buying bulk coffee grounds instead of individual Venti Lattes from Starbucks. The return on this long-term investment depends on a handful of key factors, including the price of the solar system itself.

Can solar panels be installed on a south-facing roof?

In the northern hemisphere the sun is always in the southern sky, so it's ideal to put solar panels on a south-facing roof for maximum exposure. However, solar panels can be installed in other directions with variable energy production. Want to install solar panels? Top pros in your area are ready to help.

How much do solar panels cost per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

Should you install a solar energy system on your roof?

When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. There are also a number of costs that ensure your system is installed correctly and that the solar company can operate.

Are thin-film solar panels a good fit for RVs?

Still, if you're on the go, we believe thin-film solar panels are a good fit for RVs because of their lightweight properties. Depending on which state you live in, your average 6kW solar panel system will cost between to install after accounting for the 30% solar tax credit.
