

Replacing photovoltaic panels without an electrician's license

Can a company sell a solar panel system without a license?

However, a company can sell a solar panel system without holding an electrical license, as contractor licensing requirements only apply to installations, repairs, and other alterations to the system itself. Ideal Cities in Texas for Solar Energy Systems

Do solar installers need a license?

Solar photovoltaic (PV) systems must adhere to the National Electrical Code (NEC), so a solid foundation in electrical knowledge is essential for solar installers. If your solar installation company operates in numerous states, it's essential to have the proper solar contractor license to work legally in the given state.

Do solar installers need a license in Nevada?

Nevada law requires that solar energy system installers be licensed by the Nevada State Contractors Board. Contractors may be licensed under License Classification C-37 (solar contracting), or perform solar work under License Classification C-1 (plumbing and heating) for solar thermal installations. Licensing (PV)

Do you need a license to install solar panels in Georgia?

Georgia doesn't have a specific state-level license to install solar panels. However, contractors working on solar projects in Georgia typically need to hold a valid contractor's license issued by the Georgia State Licensing Board for Residential and General Contractors. Ideal Locations in Georgia for Solar Panels

Do I need an electrician to install a solar PV system?

If the solar PV system is grid tied, the work must be performed by a licensed electrician. A homeowner may wire his/her own home, garage and premises using a state homeowner's electrical permit.

Do I need an electrical license to install a PV system?

An electrical license is not required for installing the PV system, however, an electrical license is required to make the final determinations into the electrical grid of the structure. At minimum, a single family electrical license is required for residential occupancies and a journeyman license for commercial/industrial.
